International mobility, French B driving licence

Work Experience

- Since Oct. 2019 **Researcher/Hydrologist**, University of Pau and the Pays de l'Adour, France.
Postdoctoral researcher/lecturer in statistical hydrology.
- hosted by the Irstea of Antony, the National Research Institute of Science and Technology for Environment and Agriculture.
 - Work on accounting of tidal backwater effect in hydrological modelling.
- Mar-May 2019 **Statistical consultant (400h)**, Stockholm University (Physical Geography), Sweden.
Statistical analysis of time series to get better automatic QA insurance in HMS. Project funded by the Svensk Kärnbränslehantering AB (SKB).
- Teacher assistant, Bolin Centre for Climate Research, Stockholm University, Sweden.
Introduction to R
- 2017-2018 **Researcher/Hydrologist**, Postdoctoral position, Stockholm University (Physical Geography), Sweden.
A framework for improving water resources data using hydraulic modelling. Co-supervised by Steve Lyon (Stockholm University) and Ida Westerberg (IVL, Swedish Environmental Research Institute).
 - Implementation of the Rating curve Uncertainty estimation using Hydraulic Modelling framework for rapid reliable streamflow time series assessment using just a few observations.
 - Cost-effective streamflow estimation of gauging strategies for reducing uncertainty in research, water management design and decision-making.
 - Theoretical and technical expertise in the fields of Hydrology, Hydrometry and Statistics.
 - Involvement in an international workgroup on rating curves methods. Field measurements, communications in international meetings.
- Nov-Dec 2016 **Hydrological engineer**, Irstea, National Research Institute of Science and Technology for Environment and Agriculture, Lyon/Villeurbanne, France.
Streamflow time series assessment of complex stage-discharge relations. ADCP field work.
- Nov 2013 - Oct 2016 **Doctoral student**, Irstea, National Research Institute of Science and Technology for Environment and Agriculture, Lyon/Villeurbanne, France.
Non-unique stage-discharge relations: Bayesian analysis of complex rating curves and their uncertainties
 - Bayesian and MCMC techniques, physically-based methods, complex rating curves, uncertainty assessment.
 - Study of hydraulic effects on rating curves: Hysteresis due to transient flows, Variable backwater influence and Net rating changes due to morphological changes. Impact of hydraulic knowledge on rating curves results through sensitivity analysis.
 - Software development with the associated user guides and training sessions.
 - Theoretical and technical expertise in the fields of Hydrology, Hydrometry and Statistics.
 - Involvement in an international workgroup on rating curves methods.
 - International work with the NIWA (National Institute of Water and Atmospheric Research) in New Zealand (3-month stay)
 - Monitoring of field measurement campaigns. Oral communications in international meetings, reports writing.
- Apr 2013 - Sept 2013 **Statistician (internship)**, LNE (French acronym for National Laboratory of Metrology and Testing), Trappes, France.
Programming a Matlab application for conformity assessment. Supervisor Nicolas Fischer.

Education

2013-2016 **PhD in Hydrology**, *Non unique stage-discharge relations: Bayesian analysis of complex rating curves and their uncertainties*, Doctoral School of Earth, Planetary and Environmental Sciences, University Grenoble Alpes Community, France, *Supervisors*: Michel Lang, Jérôme Le Coz and Benjamin Renard (Irstea).

External examiners: Prof. Giuliano Di Baldassarre (Uppsala University) and Prof. Jan Seibert (University of Zurich).

Jury: Prof. Jean-Luc Bertrand-Krajewski (INSA Lyon), Prof. Anne-Catherine Favre (G-INP/ENSE3), Arnaud Belleville (EDF-DTG). Guest: Gilles Pierrefeu (CNR).

PhD half funded by a French electricity generation company, la Compagnie Nationale du Rhône (CNR) and followed by French government services, le Service central d'hydrométéorologie et d'appui à la prévision des inondations (Schapi).

- Trainings: Fluvial Hydraulics, gauging techniques, Geostatistics and advanced sensitivity analyses
- Bayesian inference, MCMC techniques, Numerical and hydraulic modelling, Fortran, R

2011-2013 **Master's degree with honours in Mathematics and Applied Mathematics, specificity: mathematical engineering, option: Probability and Statistics**, University of Nantes, France.

Regressions analyses, Bayesian inference and MCMC techniques, Data Mining in sensory analysis and Chemometrics, Database, Learning techniques, Numerical computing, Optimisation, Fortran, R, MATLAB, C/C++, Java

Special Skills

Languages French (native language), English (full professional proficiency)

Communication

- Good communication skills gained through oral communication in international meetings and presentation at conferences
- Team work: presentations, collaborations and training sessions with laboratories and companies

Job-related

- Technical expertise in the physical water-related disciplines (focus on hydrometry, hydraulics and uncertainty assessment)
- Technical expertise in Applied Mathematics (through Statistics and numerical computing), programming and statistical modelling

Computer

- Proficient with Microsoft Office programmes, L^AT_EX environment, different programming languages (Fortran, R and MATLAB)
- Competent with C/C++, BUGS, JAGS and Java

Driving licence French B driving licence

Extracurricular activities

Sports Gaelic football (player and men's club officer), Basket ball, gym training
