Olivier Delaigue has been a research data scientist at INRAE since 2006. A graduate of the University of Lyon with a Master's degree in Biostatistics applied to Ecology, he began his career in hydro-ecology before turning his focus to hydrology, particularly through data management, geomatics, and the development of modeling tools. He is responsible for the development of the airGR hydrological modeling software, which is now widely used worldwide. He also lectures at Sorbonne University, École des Ponts ParisTech, and École Polytechnique.
