Maria-Helena Ramos is a Research Scientist in hydrology and hydrometeorology at the French National Research Institute for Agriculture, Food and the Environment (INRAE). She is also occasional lecturer at Sorbonne Université, Polytech Paris and EIVP Engineering School in Paris. She has participated to several national and European research and innovation projects, published over 100 scientific papers and reports, organized training courses on flood forecasting to post-graduate students and professionals, as well as co-authored several games for teaching and training on the use of probabilistic predictions in hydrology. Dr. Ramos was co-chair of the Hydrological Ensemble Prediction Experiment (HEPEX) from 2014 to 2018. She is member of the advisory board of the European and Global Flood Awareness Systems, and was appointed a fellow of the ECMWF (European Centre for Medium-Range Weather Forecasts) in Reading, UK, in 2019. She is currently the president of the Hydrological Sciences Division of the European Geosciences Union (EGU).
